

Scottish Parliament Constituencies and Historic Counties

Scottish Parliament constituency areas, mapped against the RealCounties geographic county boundaries

Scope. This reference gives two alphabetical look-ups for all 73 Scottish Parliament constituencies: constituency to historic county, then historic county to every constituency containing part of it. Constituencies are electoral areas; historic counties are a separate geographical layer.

Method. Percentages reproduce the RealCounties interactive map's authoritative Definition A intersection summary for the Scottish Parliament constituencies layer, generated 24 June 2026. Each constituency is normalised across its historic-county intersection area, excluding coastal and tidal-water residuals, so displayed shares total 100%. Values are rounded to two decimal places; negligible boundary-processing slivers are not listed.

Historic-county boundaries are those defined in Definition A of the Historic Counties Standard, published by the Historic Counties Trust. The same definition is used by the Office for National Statistics in its *Index of Place Names for Great Britain*.
